Tengassee Election. election has astonished both parties, and realized. the result so different from what was ca culated-the vote of numbers of the counties exceeding the Comptrollers report of white polls in 1837-has created the suspicion that all was not fair, and will probably lead to the investigation dented vote in some of the counties, an infant Son. goes far to confirm the belief that fraud of the blackest kind has been perpetrated, and the result proves the powerful and overwhelming influence of the General Government, when brought to bear upon the freedom of elections. If the loco foco party are successful in the fall of 1840, the permanent power of the Federal Executive is irredeemably fixed upon the country, our liberties and our republican institutions are at the capricious will of one man. That the Tennesses elections have been attended by corruption of the blackest nature, there is other testimony than the wonderful and astonishing increase in the votes polled, as the Judges and Clerks of the precincts in Cannon county have refused to send in the poll, and thus, by retaining them, prevent the investigation those frauds which a correspondent o the Nashville Whig says "would astonish the world." Although the Whigs have been beaten, we are glad to see

For the Matison Whig Advocate. Political Disquisitions .-- No. 2.

What a mighty difference the omission f two little letters, and the substitution of two others makes in the signification of one small word? Do you ask, Mr Elitor, what bearing has such a question upon my Political Disquisitions? I undertake to show its bearing.

In my first No. in adverting to Col Fulton's anxiety to keep national politics out of view in the present canvass. I wrote "let him, also, forbear, henceforth, to preach his glozing story, that national politics should not influence the election of members to the Legislature. In printing the sentence I am made to say "glaring" instead of glozing. My meaning was, that Col. Fulton's saying them arming for the contest in 1840 that national politics should not influence the suffrages of the people in the elec tion of members to the Legislature, was calculated to entice the Whigs from the nath of duty: to induce them to sacri fice their principles by voting for him Col.
